

# Clinical Trial Research

Today we are exploring clinical trial research with

## The Chocolate Trial

Before we can do a clinical trial we need

### A Question

It all starts with a question which we need to answer

### Funding

We need money to pay for a clinical trial

### Public Involvement

We ask patients or carers for their ideas about the question and how we will try to answer it

### Ethics

We have to check the clinical trial is safe and fair

### Sites

We ask hospitals to sign-up to host the clinical trial

### People

We ask staff at the hospitals to find people to take part in the trial
