

FOX TROT Platform Summer Celebrations!

June was a fantastic month for the FOX TROT Platform, and we wanted to share with you all the achievements in the platform over the month of June!

In June we had **7 FOX TROT 2 randomisations** which is our best month for recruitment so far in this arm! We know it can be a challenging trial to recruit to, so this is fantastic! Thank you to all the sites who contributed to this.

We have now recruited **over 500 participants** across the FOX TROT platform with a total of 529 patients recruited both in the UK and in France and India! Thank you to all sites for helping us reach this significant milestone!

It has also been a great month for FOX TROT 4 with **2 randomisations!** and FOX TROT 5 with **4 randomisations**, which is currently recruiting ahead of target!

Our site of the month is **Ipswich Hospital** who have randomised 3 participants in June; 2 for FOX TROT 2 and 1 for FOX TROT 5. Well done team!
